## FIRST SKYDIVE

### Tandem Skydiving

Tandem skydive is an incredibly easy, safe and enjoyable way to experience the excitement of Wyoming skydive without having to learn how.

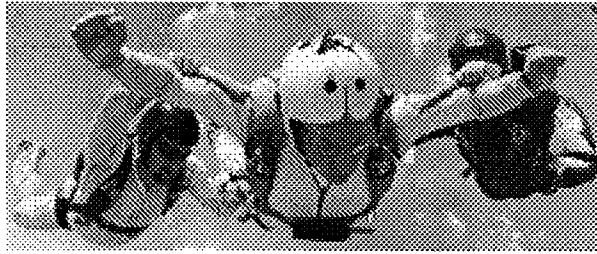

Freefall at speeds of up to 120mph and enjoy breathtaking views during you canopy ride.

Feel a total sense of freedom while securely harnessed to your personal sky diving instructor. The exhilarating freefall combined with the peace and tranquility of the parachute ride makes your tandem skydive a unique experience you will never forget.

Allow 2-3 hours of your time for the experience of a life time. Tandem skydive is available 7 days per week, all year.

### Accelerated Freefall

For a more advanced approach, AFF (Accelerated Freefall) training is available. You may experience an AFF Level one jump as your first Wyoming skydive, and should you decide to continue, it will be considered the first portion of your skydive certification program.

Accelerated freefall is the fast track method of learning to skydive. It is the ultimate in skydiving instruction for fun and consists of a 7 stage program allowing you to freefall on every skydive.

### ***Stage 1***

Training: Approximately 5 hours ground training and jump with 2 instructors.

Objectives: Stable body position, altitude awareness, parachute activation, radio assisted landing.

### ***Stage 2***

Training: Body awareness, ground training and jump with 2 instructors.

Objectives: Stable body relaxation, pilot chute throw and turning techniques, radio assisted landing.

### ***Stage 3***

Training: Hover control and holding a direction, and jump with 2 instructors.

Objectives: Balanced body position, hover control, hold heading, radio assisted landing.

### ***Stage 4***

Training: Consolidation of previous levels. Repeat of stage 3. Depending on progress your jump will be with 1 or 2 instructors, with or without radio assisted landing.

### ***Stage 5***

Training: Learning to turn and jump with 1 instructor.

Objectives: Linked or unlinked freefall, 360 degree turns.

**Stage 6**

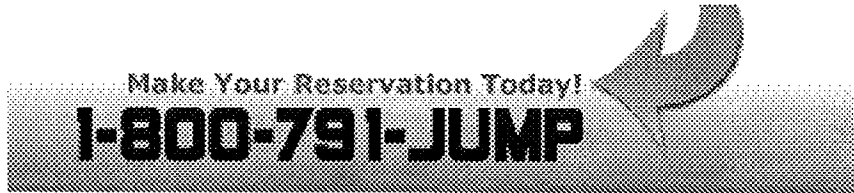

Training: Consolidation repeat of stage 5 with forward movement and jump with 1 instructor.

Objectives: To consolidate progress and achieve forward movement.

**Stage 7**

Training: Backloops and tracking and jump with 1 instructor.

Objectives: Dive exit, backloops, 180-degree turn, delta, flare and wave off.

**Freefall Video and DVD**

You only make your first jump once, and to ensure that you can share the moment with your friends and family, have your jump recorded by an expert.

Starting with a pre-jump interview on the ground, your cameraman will record your experience from getting "geared up" through your landing in front of friends and followed by a post jump interview.

Your camera man is only feet away during your entire skydive, and will be waiting for you on the ground to record your landing and comments.

The entire video is set to music and prepared for you usually within 15 to 30 minutes of your landing.

Get the whole experience, starting with your arrival, the plane ride to altitude, freefall, and landing all recorded for you to enjoy again and again. Skydiving is like nothing you can describe... Get it on tape or DVD to share with your friends and family.

Video is provided on a first come first serve basis. Call a Skydiving Wyoming Representative today for more information, or to schedule your skydive!

**FREQUENTLY ASKED QUESTIONS**

**1. What is Tandem Skydiving?**

Tandem Skydiving is the best method for making your first skydive. It takes a minimal amount of instruction, and allows you to make your initial skydive(s) with an instructor harnessed to you for the entire skydive experience.

**2. What is Accelerated Free Fall?**

AFF is the quickest method of becoming a qualified skydiver and is also the easiest way to learn with approximately 50 seconds of free fall on every jump guided by our expert instructors. Most of OUR skydives are made from 15,000 ft, and AFF usually turns out to be much cheaper in the long run, and much more fun than the outdated static line method.

**3. What are the benefits of AFF over other training methods?**

There are many benefits, but two of the main ones are the continuous exposure to free fall, that means that you are in free fall for a long time giving you the time to practice your free fall techniques. Another is our ability to teach you in free fall using hand signals to adjust your body position, thereby giving you a better result.

**4. How will I know how I am doing on the course?**

As well as your debriefs, we offer video of your jumps, these videos are used to show you how well you are doing and are also combined for you to have and take with you as a record of the whole trip.

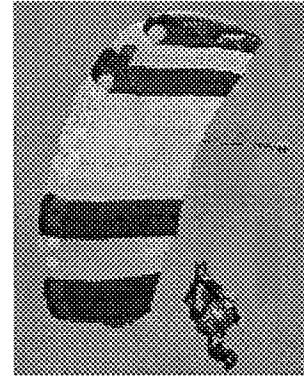

**5. How does free fall feel?**

Free Fall is not the stomach churning feeling of a fun fair ride; because you are falling on a cushion of air like a hovercraft it is a feeling of buoyancy similar to being in the water, but with a much greater thrill.

## **6. What if I do not open the parachute?**

The opening of the parachute is a very simple affair where you take a toggle attached to a pilot chute and throw it into the airflow; the parachute then opens in sequence. If you lost altitude awareness we would guide you through hand signals telling you to open the parachute and if you did not respond we would open it for you. You should also recognize that our parachutes are fitted with a computerized automatic activation device, which would open the parachute for you if all else failed.

## **7. After opening is it easy to find the landing zone and fly the parachute to land in the target area?**

This worries many people, but everyone finds this easy, after teaching you exactly what to do we give you a mounted radio, and talk you down till you are confident and competent to fly and land yourself. Our canopies fly at approximately 20 mph and are great fun to steer across the sky.

## **8. Are the landings hard?**

We now use the latest ram air canopies, which allow you to land like a fairies fluff! Even the big guys can be afforded soft landings.

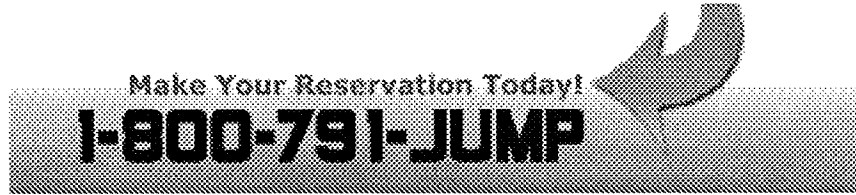

## **9. Is packing the parachute difficult?**

Packing is a very simple procedure, we teach you to pack as the course progresses so that you will be competent at all aspects of skydive before we are finished with you. You are not expected to pack parachutes on your initial skydives.

## **10. Will I be scared?**

Everyone experiences some fear throughout the course. Some find the first jump the most frightening, whereas others feel more relaxed about the first skydive, then feel it

later in the course. This is part of the adrenalin buzz of this course. One of the things you will achieve is the ability to confront and control your fear, when you get past this stage you can really start to relax and enjoy the sport.
